Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1-5, 7-12 and 15-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Pano (U.S. Patent No. 5,079,979).

Pano teaches cutting tool assembly having tool holder (1), cutting insert (17) detachably held as well engaging the abutment walls of the insert seat (pocket) (15) of the insert holder/support member (13). The insert support member (13) is removable held in the tool holder by clamp (2) (see figures 2 & 3). Pano also teaches insert support member (13) having insert receiving pockets at opposite ends, body portion and clamping portion (14a) joined by a resilient portion having plurality (two) of elongated slits (16) (Col. 3, lines 36-42). Figure 3 shows an aperture spaced from insert seat/pocket (15) and separated by elongated slit (16) having an end that opens into the aperture.

Claim Rejections - 35 USC § 103

Art Unit: 3722

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Pano (U.S. Patent No. 5,079,979) in view of Hedlund (U.S. Patent No. 5,360,298).

Pano teaches cutting tool assembly having tool holder and detachable held cutting insert (17).

However, Pano does not teach the gripping portion between the clamping portion and the insert as being V-shaped.

Hedlund teaches in Figure 11, a V-shaped interface between the clamping portion and the insert (Col. 5, lines 23-30).

Therefore, it would have been obvious to one of ordinary skill in the art to provide such a shape (V-shape) on Pano's invention for the purpose of achieving optimum engagement or contact surfaces between the insert and the tool ('298, Col. 1, lines 63-68).

Allowable Subject Matter

Art Unit: 3722

3. Claims 13 and 14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
